Orca™

PRODUCT DATASHEET

OrcaNu Time Attendance

From punch to payroll — attendance that computes itself.

OrcaNu collects punches from fingerprint and face devices, mobile check-ins and web clock-ins, then applies your shift rules automatically — lateness, overtime, breaks and rotations — so month-end is a review, not a reconstruction. Because OrcaNu shares the ORCA core with HR and payroll, approved hours flow straight into salary runs without re-keying.

FEATURES & MODULES

Biometric Devices
Fingerprint and face terminals enrolled and synced centrally across sites.

Mobile Punch
Geofenced check-in for field teams — punch only counts inside the site radius.

Shifts & Rosters
Fixed, rotating and split shifts with drag-and-drop roster planning.

Overtime & Lateness Rules
Grace periods, rounding and OT multipliers computed exactly as your policy says.

Leave Integration
Approved leave lands on the timesheet automatically — no double entry.

Payroll-Ready Output
Approved hours feed WPS payroll runs in ORCA HR without spreadsheets.
